Surakarta

Full Stack Developer with hands-on experience in building and maintaining web applications, admin dashboards, and business workflow systems. Experienced in frontend and backend development using JavaScript/TypeScript, React.js, Next.js, Vue.js, Node.js, Laravel, Golang, and SQL databases. Skilled in developing REST APIs, authentication, CRUD modules, data mapping, reporting/export features, and debugging production issues. Successfully contributed to projects such as membership management systems, warehouse/sales modules, stock validation, dashboard analytics, and internal business applications. Detail-oriented, fast learner, and able to work independently or with a team to deliver clean, scalable, and maintainable solutions.

Work Experiences

CV Menara Astra - Boyolali, Indonesia

Dec 2025 - Jun 2026

Programmer

Seven Smarts Indonesia is an IT consulting and software development company based in Boyolali, Central Java. The company provides custom software development services for websites, Android applications, iOS applications, and business management systems. Seven Smarts focuses on helping businesses improve operational efficiency, digital transformation, and workflow management through tailored technology solutions that match each client's needs and business culture.

- Developed and maintained integrated web and mobile applications to support internal business operations, including sales management, master data, pricing systems, web portal APIs, and mobile app features.
- Built and improved backend REST APIs using Laravel and PHP, including database integration, business logic implementation, and API support for frontend and mobile applications.
- Developed cross-platform mobile application features using Flutter, connected with backend services to support real-time business workflows.
- Contributed to frontend development and integration using Next.js, JavaScript, HTML, CSS, and Bootstrap to improve application usability and user experience.
- Designed and managed database structures using MySQL and PostgreSQL to support scalable application features and efficient data processing.
- Implemented and supported cloud-based features using AWS S3 for file storage and AWS Cognito for authentication-related functionality.
- Assisted in debugging, issue fixing, system maintenance, and feature enhancement to improve application stability and workflow efficiency.
- Collaborated with team members to analyze project requirements, develop scalable solutions, and deliver application features based on business needs.

PT Menara Astra - Jakarta, Indonesia

Mar 2022 - Mar 2023

Internship Full Stack Developer

PT Menara Astra / Astra Property is a property development and management company under Astra Group, focusing on commercial, residential, and industrial property portfolios. The company provides quality property solutions with strong emphasis on excellent service, sustainability, and operational excellence.

- Contributed as a Full Stack Developer Intern in Astra Property's IT and Digitalization Division, supporting web application and internal system development.
- Developed and maintained web portal APIs using Laravel and MySQL to support business application features and data integration.
- Assisted frontend development using Angular, HTML, CSS, and JavaScript to improve user interface functionality and application usability.
- Participated in code reviews, pair programming, and collaborative team projects to improve code quality and development efficiency.
- Used Postman to test API endpoints and support API documentation during development.
- Worked with Git/GitHub for version control, collaboration, and tracking code changes.
- Supported debugging, issue fixing, and feature enhancement to improve application stability and maintainability.
- Gained hands-on experience in full stack development, API integration, database handling, and teamwork in a corporate IT environment.

Education Level
